

2 Day Workhsop on Basel II Stress Testing

**Date: 6th-7th March, 2014
Venue: To be announced
Place: Mumbai | India**

Organised by: Vinod Kothari Consultants P. Ltd.

Why this course?

This course would provide an overview of objectives and principles of ICAAP framework prescribed under Pillar II of Basel standard with a specific focus on sensitivity and scenario test cases under stress testing framework under regulatory guidelines and best practices.

As Basle II, supplemented by Basle III, becomes the globally acceptable way financial intermediaries manage their risks, economic capital, and sensitivity to changes in external environment, regulators insist that banks have internal capital adequacy assessment procedures (ICAAP), which is reported to regulators as a part of Pillar 2 of Basel II. One of the important requirements of ICAAP is stress testing. Stressing testing is not just a regulatory compliance: banks internally need to evaluate the adequacy of their capital to absorb stressful external environment.

Stress testing is also required for several other investments of banks – such as investments in asset-backed securities.

This training program would not only provide perspective of ICAAP framework in the regulatory context but also provide the usage of advance techniques of stress testing and economic capital requirements offering benefits in business expansion and diversification, counterparty exposure, trading exposure etc.

It would also enable the participants to have an in-depth knowledge on various Stress Testing Components such as Credit Risk, ALM, Business Risk and Model Risk.

For whom?

- Banking and financial service industry executive management
- Capital Market and institutional investors and planners
- Risk, compliance and internal audit within the finance industry
