NBA legend Kobe Bryant died on Sunday when a helicopter he was riding in crashed and burst into flames, killing all nine people on board, including his 13-year-old daughter Gianna. Bryant, 41, a five-time NBA champion and two-time Olympic gold medalist, is widely regarded as one of the greatest basketball players in history, an iconic figure who became one of the faces of his sport during a glittering two-decade career with the Los Angeles Lakers

Facebook blames Apple for Bezos' phone hacking

Facebook has blamed Apple's operating system for the hacking of Amazon Founder and CEO Jeff Bezos' phone, saying WhatsApp's end-to-end encryption is unhackable.

Investigators believe that Bezos's iPhone was compromised after he received a 4.4MB video file containing malware via WhatsApp - in the same way when phones of 1,400 select journalists and human rights activists were broken into by Pegasus software from Israel-based NSO Group last year.

In an interview to the BBC last week, Facebook's Vice President of Global Affairs and Communications, Nick Clegg, said it wasn't WhatsApp's fault because end-to-end encryption is unhackable and blamed Apple's operating system for Bezos' episode.
