

Full Day Workshop on

Partnering in lending:

Loan sourcing, co-lending, transfer of loans, securitisation

16th December, 2022 | Bengaluru ([The Chancery Hotel](#))

Why this Workshop?

The fast growing regime of loan sourcing with the sourcing partners' guarantee was hamstrung by the RBI's restrictions on structured default guarantees, aka FLDGs. However, the world of fintech has ushered in hugely differentiated capabilities – client sourcing and liability sourcing can no longer be the strength of the same entity. As such, entities continue to search for partnering opportunities, in form of loan sourcing partnerships, co-lending, transfer and assignment of loans, as well as securitisation. Each of these arrangements have complicated regulations behind them. It is quite common to think of innovative structures, with slicing of risk and sweeping of returns, but the RBI's reference to "synthetic securitisation" is queer and intriguing.

We intend to discuss the whole range of issues – structures, principles of loan pool slicing, structured default guarantees and loan-to-loan guarantees, principles of securitisation including synthetic securitisation, the law of co-lending with its fetters and risk retention principles, transfer of loan exposures.

For the first time for us, we intend to offer this event in the hub of financial and technological innovation – Bengaluru.

₹ INR 10,000 plus GST per participant
